

**Listing of all AKNW Data Owners with summary of archived and processed data**

Data summary includes number of records of data (source files) originally received and archived at LaMNA by Data Owner and protocol type with summary of data processing. "Country" and "State/Province" both reflect the location where the majority of the data received were collected. "Census and Banding Data Processing" summarizes the number of records currently going through processing including conversion into modern databases (in progress) and those that have completed processing and are now available on the internet (online). Note that as data are processed, the number of records can increase or decrease compared to source files. Listing and record numbers current as of 18 January 2017.
